

BioDrop MD® SPRAY

Preservative free

Micro-emulsion spray for dry eyes and eye lids.

BIODROP MD® SPRAY is an excellent alternative for those who have trouble inserting eye drops.

- ✓ Does not conflict with make-up.
- ✓ Also recommended for contact lens wearers.
- ✓ Free from irritating ingredients, preservatives and materials of animal origin.
- ✓ From Europe, one of the most advanced treatments for dry eye syndrome.

UNIQUE COMPOSITION – SEA BUCKTHORN SEED OIL AND HYALURONAN

The micro emulsion strengthens the structure of the tear film. With every blink a small amount of spray spreads on the ocular surface and reinforces the tear lipid layer thus preventing excessive evaporation of water.

SEA BUCKTHORN SEED OIL

- Supports structure of tear film
- Moisturizes mucous membranes
- Natural antioxidant compounds
- Rich in omega 3-6-9 and vitamin E
- Prevents desiccation (drying) of cells

HYALURONAN

- Natural ingredient found in skin, joints, eyes
- Maintains moisture
- Helps heal damaged epithelial cells
- Lasts much longer on the eye compared to commercial brands

COMPOSITION

- Sea buckthorn seed oil, hyaluronan
- Generous 17 ml. dispenser delivering 300 sprays

Due to intentional overfill, a small volume of the solution remains in the dispenser.

BioDrop MD®

Multi-dose, preservative free

From Europe, one of the most advanced treatments for dry eye syndrome.

Free from irritating ingredients, preservatives and materials of animal origin.

BIODROP MD® eye drops are developed in cooperation with the Finnish Allergy and Asthma Foundation.

BioDrop MD®

Preservative free multidose comfort eye drop.

NATURAL MOISTURE FOR ALL DRY EYES

- Hyaluronan is a natural ingredient found in skin, joints, eyes
- Keeps eyes moist and relaxed
- Relieves symptoms of dry eye disease
- Expedites healing of corneal wounds
- Chemical and physical properties of BioDrop MD® are adjusted to resemble the healthy tear film

BioDrop MD® is also recommended for all contact lens users. We recommend applying a drop or two on the lens before insertion and use as needed.

COMPOSITION

- 0.2% hyaluronan
- Delivers 250 drops – easily dispensed

BioDrop MD® eye drops are developed in cooperation with the Finnish Allergy and Asthma Federation. They are free from irritating ingredients, preservatives and materials of animal origin.

BioDrop MD® PLUS

Preservative free multidose comfort eye drop.

UNIQUE COMPOSITION

Two natural saccharides – trehalose and hyaluronan. The lubricating and moisture-binding properties together stabilize the tear film and protect the eyes from drying.

These two ingredients have been balanced by molecular weights to offer superior binding properties, presenting the most advanced treatment for dry eye syndrome and treats severe dry eye symptoms.

TREHALOSE

- Trehalose – very high water retention
- Protects against desiccating (drying) cells
- Expedites healing of corneal wounds

HYALURONAN

- Natural ingredient found in skin, joints, eyes
- Maintains moisture
- Heals damaged epithelial cells
- Lasts much longer on the eye compared to commercial brands

COMPOSITION

- 2.0% trehalose, 0.25% hyaluronan
- Delivers 240 drops – easily dispensed
- Not too thick or gel-like but has all the benefits of a gel
- Does not blur vision
